SOURCE: blower motor for a 1997 acura tl one of 2 places either under the dash behind the glove box or under the hood on the passengerside. first i would check the fuse and or fan motor relay. these are located in the box under the hood or under the dash on the drivers side. also i would check the reostat which controls the fan speed this is located near the motor and is held in place by 2 ...

Where to locate the ac expansion valve for 2003 acura 3.2 tl

P1077 ACURA Description Engine power is achieved by closing and opening the Intake Manifold Runner Control (IMRC) valve. When the valve is closed, there is high torque at low engine speed. When the valve is open, there is high torque a high engine speed.

P1077 ACURA Intake Manifold Runner Control System ...

It's a generic code, which means that it has the same meaning for the TL as it would any other vehicle (TL or not). P0505: Idle Air Control System: Malfunction. When P0505 is triggered, it is typically caused by a stuck idle air control valve, a clogged idle air control valve, or a vacuum leak. There can be other causes as well.
