Ions Worksheet - Whitney High School

The other ions that don't participate are called spectator ions. The purpose of ionic equations is they simplify chemical equations by eliminating the species that aren't undergoing any change. This is very useful, particularly when dealing with redox reactions which are complicated enough without spectator ions getting in the way.

What are ionic equations and ionic half-equations ...

Numerical Solutions. The answer is (b) Law of conservation of mass. The number of grams of reactants (32.0 g of methane and 128.0 g of oxygen = 160.0 g total) is equal to the number of grams of product (88.0 g of carbon dioxide and 72.0 g of water = 160.0 g total).
