At The Mouth Of River

A river mouth is the part of a river where the river debouches into another river, a lake, a reservoir, a sea, or an ocean.

River mouth - Wikipedia

The mouth of a river is another name for its terminus, where it meets an ocean, sea or lake. Because rivers generally carry abundant sediment and deposit it at the mouth, they often form deltas, or broad, shallow areas. The opposite end of the river is called the headwaters or the source; however, the headwaters are often formed by several discreet sources that all occur in the same general area.

Step 2 : Answer to the question "What city lies at the mouth of the Yangtze River?" Shanghai - The mighty Yangtze River is the longest river to flow through a single country and the third longest river in the world. The river is China's most important waterway, and nearly one-third of the country's population lives in its basin.

[Answer] What city lies at the mouth of the Yangtze River?

The place where a river enters a lake, larger river, or the ocean is called its mouth. River mouths are places of much activity. As a river flows, it picks up sediment from the river bed, eroding banks, and debris on the water. The river mouth is where much of this gravel, sand, silt, and clay —called alluvium —is deposited.
