This Kohler toilet was designed to use only 1.4 gallons (5.3 L) of water for each flush. This ensures that your toilet will provide exceptional performance that is comparable to our previous 3.5 gallon (13.2 L) models. Your toilet exceeds ASME performance standards for low-consumption toilets. It was designed with a large, glazed trapway

KOHLER toilets are powerful, clean and efficient. Achieving the best flushing performance has been our focus since the 1970s. Choose one for your home.

Toilets | Bathroom | KOHLER
It is important for the tank to have the proper amount of water to ensure the toilet flushes properly. KOHLER toilets have a water level indicator located on the flush valve or on the tank wall. The water level is raised or lowered by adjusting the float on the fill valve. First, identify the type of fill valve in your toilet.

Adjust the Amount of Water in a Toilet Tank - KOHLER
A. Kohler offers many variations of almost all their toilet models, and has experimented in the past with many different features. Typically, numbers (or a single letter/number combination like K4 or Y2) after the 4- or 5-digit model number indicate the color code for your toilet.
