### Manual Transmission Fluid Types

Manual transmissions use a variety of transmission fluid ranging from regular motor oil to heavyweight hypoid gear oil. A few manufacturers even recommend automatic transmission fluid. It all depends on the vehicle, the tolerances, engineering and the type of driving you most commonly do.

### Manual Transmission Fluid Types | It Still Runs

A manual transmission requires the driver to operate the gear stick and clutch in order to change gears (unlike an automatic transmission or semi-automatic transmission, where one or both of these functions are automated).Most manual transmissions for cars allow the driver to select any gear ratio at any time, for example shifting from 2nd to 4th gear, or 5th to 3rd gear.

### Manual transmission - Wikipedia

Follow the recommendations in the manual to find the right CVT fluid. CVTs are becoming more and more common in Nissans and Subarus. Automatic transmissions (ATs) take automatic transmission fluid (ATF). ATF comes in a few different types. Always check your vehicle's owner's manual and follow the manufacturer's recommendations for what ...
